

IMPORTANT NOTES

Shrink film is clear and requires a white ink layer if the design intent is not to have the can show through. Please indicate as an overall white layer.

If the design intent is to have the can show through in places, indicate as “knock outs” to the white layer.

Some level of shrink distortion should be expected. Please consider the “Optimal Copy Area” indicated above.

Please indicate colour call outs on document for reference ease.

PMS colours are recommended in vector art where possible to avoid Flexo printing registration issues.

2 mm clear area (no ink)

DISTORTION AREA (GRAPHICS OKAY / NO COPY)

UNDERWRAP DISTORTION (GRAPHICS OKAY / NO COPY)

2 mm clear area (no ink)
