

JEFF MALLOY

Hanwell, New Brunswick

Nominated as: Track Director, Atlantic Region

I grew up in Fredericton New Brunswick about 10 houses from Fredericton Raceway. I spent most of my time as a child on the backstretch grooming and jogging horses for numerous stables.

My family has been involved in the industry for many years. My parents owned horses and my great grandfather William F. McGibbon raced horses in New Brunswick and Prince Edward Island in the 1950's and 60's.

In 2002, I completed a Bachelor of Business Administration at the University of New Brunswick. I worked for both the Federal and Provincial governments as a financial analyst.

I was elected to the board of directors of Fredericton Exhibition in 2004 and am currently serving my second term. I have been the Executive Director for Horse Racing New Brunswick since its creation in December 2008. Horse Racing New Brunswick operates Exhibition Park Raceway in Saint John NB, Fredericton Raceway in Fredericton NB, and Connell Park in Woodstock NB.

I believe in our organization, our industry and our people. I am very passionate about our industry and I am determined to make racing a viable business in our region. There have been great accomplishments over the past decade in the Atlantic region. We have seen new organizations formed, major investments in infrastructure, and increased fan base. Tracks in our region have hope for the future. We are heading in the right direction in the Atlantic Region after struggling for years. There is still much more to do. We need to continue to build on our successes.

If elected to the board of Standardbred Canada I will ensure that the voices of those whom I represent will be heard. We must unite and move forward together in order to succeed. Standardbred Canada must become stronger and lead us into the next phase of success. Our industry needs to take advantage of today's technologies. We need to have the ability to change wagering regulations for the better. Just because we are one of the oldest industries in the country, should not mean we should be regulated by archaic policies that do not work in today's world.
