

STANDARD BREED
CANADA

Looking for **REAL HORSEPOWER**

WE'RE HIRING

POSITION: QA Analyst and Software Platform Tester

Get to Know Us:

Standardbred Canada is a not-for-profit association and the national breed registry for the standardbred horse with over 6000 members. We serve our horses and members by recording pedigrees and racing statistics for the Canadian harness racing industry and by being a news leader for the industry with a very active website and monthly Trot magazine.

Culture

"It's about the H.O.R.S.E. of course" – At Standardbred Canada our corporate values promote Honesty, Ownership, Respect, Service to Others and Excellence. Our success is powered by people and technology. We champion diversity and always look for ways to put more pace into the sport. Our employees are the real horsepower of the association and are always at the core of who we are and what we do.

Location: 2150 Meadowvale Blvd, Mississauga, Ontario

Summary of Position: • **QA Analyst and Software Platform Tester**

Standardbred Canada is looking for a great result driven QA Analyst/ Software Platform Tester who's not afraid of searching for a needle in a stack of hay. You are willing to test every aspect of the newly developed Single Sign On Module and Auctions Module that is a part of our Drupal Website.

If you are someone who loves the border between development, testing and product, then this is a great opportunity to become a part of a multicultural development team of business and technology enthusiasts.

The most important character of this job is ensuring tests on software functionality, performance, and usability. You will analyse the results, and report observations to the internal team and external development team.

In short, you should be result-driven, have good communication skills, and up-to-date knowledge of software programming and software test design. This will help us lead the testing of Decoupled Drupal Systems that are being developed by our partners (SSO, Auctions).

The job might be a great fit for you if you are good at:

- Pre-Planning Activities
- Testing (Exploratory, Automated, Smoke, Regression and Feature)
- Defining testable user stories
- Creating acceptance tests
- Follow-up with internal teams and partners
- Quality risk analyses
- Data validation
- You communicate clearly, you speak eloquently and you can explain things easily.
- You pay attention to details and nothing falls through the cracks on your watch.

Extra points that make you stand out even more:

- You are familiar with Drupal sites 8.x or 9
- You have exposure to cross-browser and web API testing
- You have experience working internal and external development teams
- You are organized and look forward to daily catch-ups
- You are available immediately

Qualifications & Experience:

- 3-4 years of experience in Testing, QA, Automation, Quality Assurance / Software Product and handling backlog
- Experience with Drupal (8,9) as CMS and Drupal integrations with 3rd party systems
- Expertise configuring custom Drupal modules (SSO, ecommerce, Views, Page Manager, Migrate)
- Some exposure in developing front end technologies, including HTML, CSS, JavaScript, JSON, JQuery
- Basic knowledge of PHP, AJAX, Bootstrap, XML, SOAP, WSDL web services, SQL development skills with MYSQL, GIT and Proficiency in CI / CD, Jenkins, GitHub
- Prior experience of designing new automation frameworks and implementing test automations
- Experience in testing of projects (Drupal/ Web/Full stack/Desktop/ Mobile and UI)
- Ability for effective bug capturing and bug reporting skills with fine detail in performance, software life cycle and mobile device and manual checks.

We thank all those who apply but only those applicants who are selected for an interview will be contacted.
